SUMMARY

Full-Stack Developer skilled in PHP, Java, SQL, HTML, CSS, and JavaScript, with experience in building responsive, database-driven web applications. Strong background in developing role-based systems, dashboards, and result management platforms with secure authentication and scalable architectures. Adept at delivering end-to-end solutions, from designing front-end interfaces to managing backend logic and database operations.

SKILLS

- Frontend: HTML, CSS, JavaScript, Bootstrap, React
- Backend: PHP, Java, Python
- Database: SQL, Firebase
- Tools & Platforms: Excel (Data Analysis, Pivot Tables, Charts), PowerPoint (Presentations & Reports), MS Word (Documentation & Reports) Git, GitHub, XAMPP, VS Code
- Core Competencies: Full-Stack Web Development, Responsive UI Design, Role-Based Systems, Authentication & Security, Problem-Solving, Independent Decision-Making
- Soft Skills: Communication (Phone, Email, Stakeholder Management), Detail-Oriented Documentation
- Languages: English (Fluent), Telugu (Native)

EDUCATION

Bachelor of Computer Science & Engineering

Oct 2022 - May 2026

Sir CR Reddy College of Engineering, Andhra Pradesh

- Relevant Coursework: Data Structures, DBMS, Networks, Data Mining, Machine Learning

PROJECTS

Vardhan Seeds Website

[Live Demo](#)

- Built an e-commerce platform for seed products with secure authentication
- Integrated Firebase for real-time database and storage
- Designed an admin panel with role-based access for managing content

STUDENT RESULT MANAGEMENT SYSTEM

[Live Demo](#)

- Developed a role-based web application with student, staff, and admin dashboards.
- Implemented secure login, session management, and password hashing.
- Built modules for result publishing, performance tracking (Chart.js), and notices.
- Enabled report generation (PDF/Excel exports) for academic records.
- Designed a responsive UI with Bootstrap, improving accessibility and usability.

Farm Resource Management System (FRMS)

Full-stack Web Application | PHP, SQL, HTML, CSS, JavaScript

- Designed and implemented a role-based access system with separate dashboards for Admin, Manager, Staff, Organizer, and Farmers.
- Built CRUD modules for managing managers, staff, organizers, farmers, villages, varieties, and production data.
- Developed reusable components (header, footer, sidebar, topbar) to maintain a consistent UI.
- Integrated session-based authentication with secure login/logout for all roles.
- Designed relational database schema for storing users, farmers, villages, crop varieties, and production records.
- Applied modular project structure to enhance scalability and maintainability.

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp (2023)
- CSS — HackerRank (2023)
- C Programming — SoloLearn (2023)
